Pacific Aviation Museum Pearl Harbor is located on Historic Ford Island, where bombs fell during the attack on Pearl Harbor, December 7, 1941. Visitors to the Museum can see remnants from that day of infamy, including the 158-foot tall, red and white iconic Ford Island Field Control Tower, Hangars 37 and 79, and bullet holes in Hangar 79. Through its preservation and restoration of World War II fighter planes and accompanying artifacts in the Museum's historic hangars, Pacific Aviation Museum Pearl Harbor shares the story of the vital role aviation played in the winning of World War II, and its continuing role in maintaining America's freedom and peace.

Pacific Aviation Museum Pearl Harbor is a 501(c) (3) non-profit organization. Its mission is to develop and maintain an internationally recognized aviation museum on Historic Ford Island that educates young and old alike, honors aviators and their support personnel who defended freedom in The Pacific Region, and to preserve Pacific aviation history.
